Description

📅 2 days

⭐ accredited training

💬 language of training: English or Polish

📗 language of materials: English

COBIT® 2019 is a globally recognized framework for the governance and management of enterprise information and related technology. It provides a comprehensive approach to creating business value through the effective and innovative use of IT.

The COBIT® 2019 Foundation training enables participants to understand the concepts, principles, models, and key definitions of the COBIT framework, as well as its practical application in governing and managing enterprise IT environments. This gives participants a complete business perspective on governance and management of enterprise IT and the knowledge of how to support the achievement of strategic objectives.

The course is intended for current holders of the COBIT® 5 Foundation certificate as well as for professionals without prior certification who are seeking to obtain the most recent COBIT® 2019 Foundation certificate.

The training program covers the core concepts, models, and key definitions of the COBIT methodology, preparing participants to pass the COBIT® 2019 Foundation exam and apply their knowledge in their organization.

Purpose of the training

- ✅ Prepare to apply the COBIT® 2019 framework in any organization,
- ✅ Understand the description and objectives of the COBIT product architecture,
- ✅ Comprehend and describe the principles of the governance system and the principles of the COBIT framework itself,
- ✅ Understand the overall structure and content of the Goals Cascade,
- ✅ Understand the relationship between the governance and management objectives and the components of the governance system,
- ✅ Understand the differences between performance management based on the maturity model and the capability model,
- ✅ Understand how to design a governance system tailored to organizational needs using COBIT,

inprogress®

- Explain the key elements of the business case for COBIT,
