Description

2 days

Accredited training

language of training: Polish or English

language of materials: English

Scaled Agile Framework (SAFe®) is a methodology for agile management and workflow that helps organizations scale Lean and Agile practices.

The **SAFe® Product Owner/Product Manager** training prepares participants to manage value delivery in Lean enterprises. Participants will learn the key factors influencing effective work as a Product Owner or Product Manager within an organization. They will also discover how to use Lean practices to plan and execute Iterations and Planning Intervals (PIs) effectively.

There are no formal prerequisites. However, the following are recommended:

- Completion of the Leading SAFe® course
- Experience working in a SAFe environment
- Familiarity with Lean, Agile, or similar methodologies

There are no formal prerequisites, but it is recommended to have completed Leading SAFe, or to have experience with SAFe environments, Lean, Agile, or similar methodologies.

Purpose of the training

- Prepare to take on the role of Product Owner or Product Manager in a Lean enterprise
- Gain understanding of the Agile Release Train (ART)
- Become familiar with DevOps culture
- Develop skills for collaborating with customers and stakeholders to identify and prioritize requirements
- Prepare for the SAFe® Product Owner/Product Manager Exam
- Learn Lean and Agile best practices

Target group

- Program and Project Managers
- Scrum Masters and Product Owners

- Executives and managers (e.g., department heads, CTOs)
- Business Analysts
- Consultants and Agile Coaches
- Anyone wishing to expand their knowledge in Lean, DevOps, SAFe®, or Scrum

Benefits

- Increased effectiveness in working with customers and organizations
- Confirmation of knowledge and competence to serve as a Product Owner/Product Manager in an enterprise
- One-year access to SAFe Studio, including resources and tools for daily work in an agile environment
- Access to the SAFe professionals community and dedicated events for certified practitioners
- Upon passing the exam, participants receive a **Certified SAFe® Product Owner/Product Manager** certification

Exam and certification

Exam details:

- purchase of the exam mandatory, in accordance with the Accreditor's requirements,
- multiple-choice, single-response questions test,
- number of questions: 45,
- pass threshold: 80% (36 out of 45 possible points),
- language of exam: English,
- duration: 90 minutes,
- form: online unsupervised,
- the exam is held on the SAFe® Studio platform,
- closed book – no use of materials,
- validity of the exam voucher: 60 days,
- validity of the certificate: 1 year,
- the participant who scores the necessary number of points in the exam is awarded the international certificate in electronic form.

As part of the purchased **foundational training***, each participant is entitled to **take the exam twice**, provided that **both attempts occur within 60 days of completing the course**. The second attempt can be taken immediately after the first one and does not require any waiting period.

In the case of an unsuccessful exam result, the participant may purchase an **exam retake**.

The third exam attempt (first retake) can be taken immediately after the second, the fourth attempt (second retake) - after 10 days from the third, and the fifth attempt (third retake) - after 30 days from the fourth attempt.

Each additional attempt is subject to a fee and requires a 30-day waiting period.

A **purchased retake remains valid for 60 days from the date of purchase**, as long as the exam is offered by the Accreditor.

The exam retake must be **purchased independently by the participant** via the **SAFe Studio portal**.

***Foundational trainings** include: Leading SAFe®, SAFe® Scrum Master, SAFe® Product Owner / Product Manager, SAFe® for Teams, and SAFe® DevOps.

Training programme

MODULE 1 – ROLES AND RESPONSIBILITIES OF THE PRODUCT OWNER AND PRODUCT MANAGER

MODULE 2 – PREPARING FOR PI PLANNING

MODULE 3 – CONDUCTING PI PLANNING

MODULE 4 – EXECUTION AND WORKING DURING THE ITERATION

MODULE 5 – PI CEREMONIES AND PO/PM RESPONSIBILITIES DURING THE PI

Note

The SAFe certification path does not enforce a specific development path - participants may attend any courses of interest without completing prerequisites. However, the first 2 to 4 hours of each course typically include an introductory segment (depending on the course) designed to align participant knowledge. This foundational content is repeated in all SAFe trainings and is a standard practice across all training providers.

Methods and tools used in training

Training is conducted by **lecture and workshop** methods.

LECTURE PART	WORKSHOP PART
--------------	---------------

It is conducted on the basis of a multimedia presentation prepared by the presenter and is enriched by the use of moderated discussion, exchange of participants' experiences and case studies.

- small group exercises,
- individual exercises,
- case studies,
- moderated discussion,
- exchange of experience among participants

The selection of the form and scope of training, supported by the professional and trainer's experience, ensures that participants **receive a comprehensive overview of the topics and acquire practical skills.**
